

Toy Design as a Vehicle for

Vertical Collaboration

in a

K-12 Setting

Aruna Chavali

Marymount School of New York

Workshop Outline

- Introduction
 - Why are you here?
- Project Description
- Stories from the front lines...
- Lessons Learned/Concerns
- Brainstorming Ideas
- Conclusion

Introduction

-Aruna Chavali

-Engineering degree from Smith College- engineering with a liberal arts background

Project Description

During a year long engineering elective for girls in Class XII, students worked in teams of 4 to **design** and **prototype** a toy aimed to **encourage, inspire, and teach** STEAM topics to girls in Class IV.

What's the importance of this project?

- Role models- the older girls serve as role models for the younger girls; keep them engaged in STEM topics
- Engineering a product to fulfill a **specific social need** with built in **client feedback**

Steps

- Initial brainstorming sessions with VI graders
- Go back to the VI graders with prototype to garner feedback
- Incorporate feedback and then showcase *final* prototype

Final Products- 4 Toys

1. Bridge Builder: Board game with bridge construction
2. Zip It! : Zip line construction kit
3. Roomavate: Room construction kit specific to clients in the game
4. Tower: Tower Board game with tallest tower construction

Bridge builder- One story...

- Bridge building game with an accompanying board
- Each colored block on the board represents a building piece that can be used to construct the bridge that will carry a load

Children's Book for "Introduce a Girl to Engineering Day" inspired by Rosie Revere Engineer

Concerns

- Time
 - Schedule differences
- Buy in from students, teachers and admin
- Age-appropriate, content-appropriate projects
- Existing Big Sister-Little Sister programs in many settings- redundancy?
- Can Big Sister-Little Sister programs extend to include STEM related projects?

Small group discussion prompts

- What is the value in vertical collaboration? What are the BIG objectives?
- Do the projects have to be long-term or short-term one time interactions deliver the same value?
- How can the value of this type of collaboration be communicated to all involved?

Brainstorming Ideas

Thank you!
